DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller et al.

Miller et al. disclose a hybrid synchronous motor with a toroidal winding (14) comprising: a rotor and a stator, the stator having at least one assembly of coaxially displaced ferromagnetic rings (12), the rings having ferromagnetic cogs (30, teeth between slots 26) both on inner and outer circumferences thereof, and the assembly being provided with a polyphase toroidal coil made of coil segments so that a coil wire is lying between the cogs.

Regarding claim 2, Miller et al. a plurality of the stator assemblies and wherein the toroidal coil is formed around all of stator assemblies simultaneously, and wherein the common toroidal coil is wound around or assembled from U-shaped copper parts.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2834

4. Claims 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller et al. in view of Danilevich et al.

Miller et al. disclose every aspect of the claimed invention except for the gaps between rotor and stator are filled with a ferromagnetic liquid.

Danilevich et al. disclose the gaps between rotor and stator are filled with a ferromagnetic liquid.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the motor of Miller et al. and filled the gaps between rotor and stator with a ferromagnetic liquid as taught by Danilevich et al. in order to provide the motor with improve heat exchange.

Allowable Subject Matter

5. Claims 3-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to claims 1-2, and 5-7 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
